

These simple, light, but robust air filters come complete with baseplate, brackets and clips for a quick-release attachment to the Weber DGV or DGAV carburettors used in the F2 Stock Car formula.

The standard JC10 is now available with an increased overall height (JC10R) for greater dust holding capacity.

The multi-layer foam filter materials are similar to those in the MEGAFLOW ranges and are therefore fire-retardant. The filter is rated for up to 260 or 350 bhp, so it has plenty of capacity in reserve.

It can also be used with any of the DGAR, DGAS or DGR ranges of carburettors.

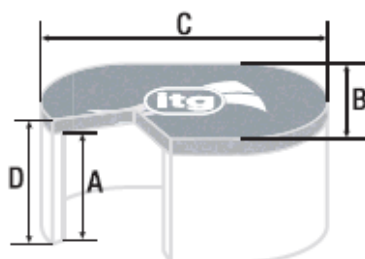

#### JC10 – BHP ratings

Filter element	Number of filters on engine
	1
JC10	260
JC10R	350

BHP ratings are a guide only

#### JC10 – Dimensions

#### Filter size options

	JC10	JC10R
Internal height	80	130
Width	148	148
Length	192	192
Overall height	105	155

All dimensions are in mm.

**Important:**  
All filters must be oiled prior to use
