BRAKE BIAS DIAL

MAXIMISE YOUR BRAKE PERFORMANCE

www.monitmotorsport.com

CONTROL

Set your preferred 'zero' point and then accurately adjust your brake balance to any precise position. With the display always staying on, the set brake bias position can be seen at all times - ensuring you never make an adjustment error.

ADJUST

The Monit Dial display provides confidence to adjust brake balance more regularly, knowing you can quickly return to your 'zero' point if needed. Enabling you to adapt to changing conditions and improve car balance and braking performance.

WIN

Adjust bias accurately with Monit, even while driving. Optimise brake balance in all conditions to extract the maximum brake performance from your competition vehicles current brake package.

UPGRADE TO THE LATEST TECHNOLOGY WITH MONIT AND START SETTING FASTER TIMES!

The new Monit Brake Dial is a remote brake bias adjuster that has a built-in display allowing accurate adjustment of brake bias to any precise position, even while driving.

Easy installation. A drop-in replacement for existing remote bias adjusters. Two mounting types available.

Universally compatible with all pedal boxes. Comes complete with; flexible shaft, balance bar adaptors, direction stickers and all fasteners.

Battery powered by a user replaceable CR2032 coin cell. 18month battery life. The LCD display stays on and constantly displays the set bias position.

Water and dust resistant. Suitable for use in open cockpits and operation in all weather conditions. Designed using carefully selected engineering materials.

Adjustable to suit driver preferences. Position can be displayed relative to the FRONT or REAR bias, or Absolute position can be selected for other uses, such as suspension adjustment.
